

DexKit

What is DexKit?

DexKit is a blockchain software startup dedicated to making DApp development accessible, empowering decentralized communities, and driving transformative change in the Web3 ecosystem. Our flagship product, DexAppBuilder, offers a comprehensive kit of no-code/low-code tools and solutions, enabling effortless DApp creation while fostering a collaborative Web3 community.

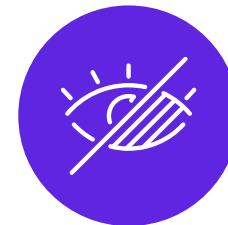

What problems do we help solve?

Key challenges

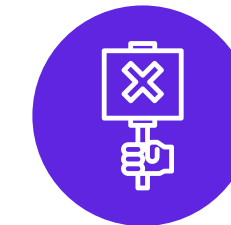

Accessibility challenges in Web3

In Web3, technical complexity hinders many from engaging in projects and exploring its potential.

Lack of control in Web2

In Web2, individuals and communities lack control over their digital lives due to centralized platforms' dominance, limiting privacy, autonomy, and creativity.

Limited ownership and distribution in Web2

In Web2, app builders face hurdles with limited ownership and distribution due to platform rules, reducing creativity and restricting access to wider audiences.

No-code/low-code approach

DexAppBuilder offers a comprehensive kit of no-code/low-code tools and solutions, empowering users to effortlessly create custom DApps and build decentralized communities within the Web3 ecosystem, regardless of their technical expertise.

Digital Empowerment

DexAppBuilder empowers individuals and communities to take control of their digital destinies, enabling them to define the rules, govern data, and ensure privacy and autonomy in their digital interactions.

NFT-based ownership and distribution

DexAppBuilder enables app builders to create and sell their apps as NFTs, giving them ownership, control, access to broader audiences, and monetization opportunities.

DexAppBuilder, a DexKit solution

Our product

DexAppBuilder

Your gateway to DApp creation in Web3.

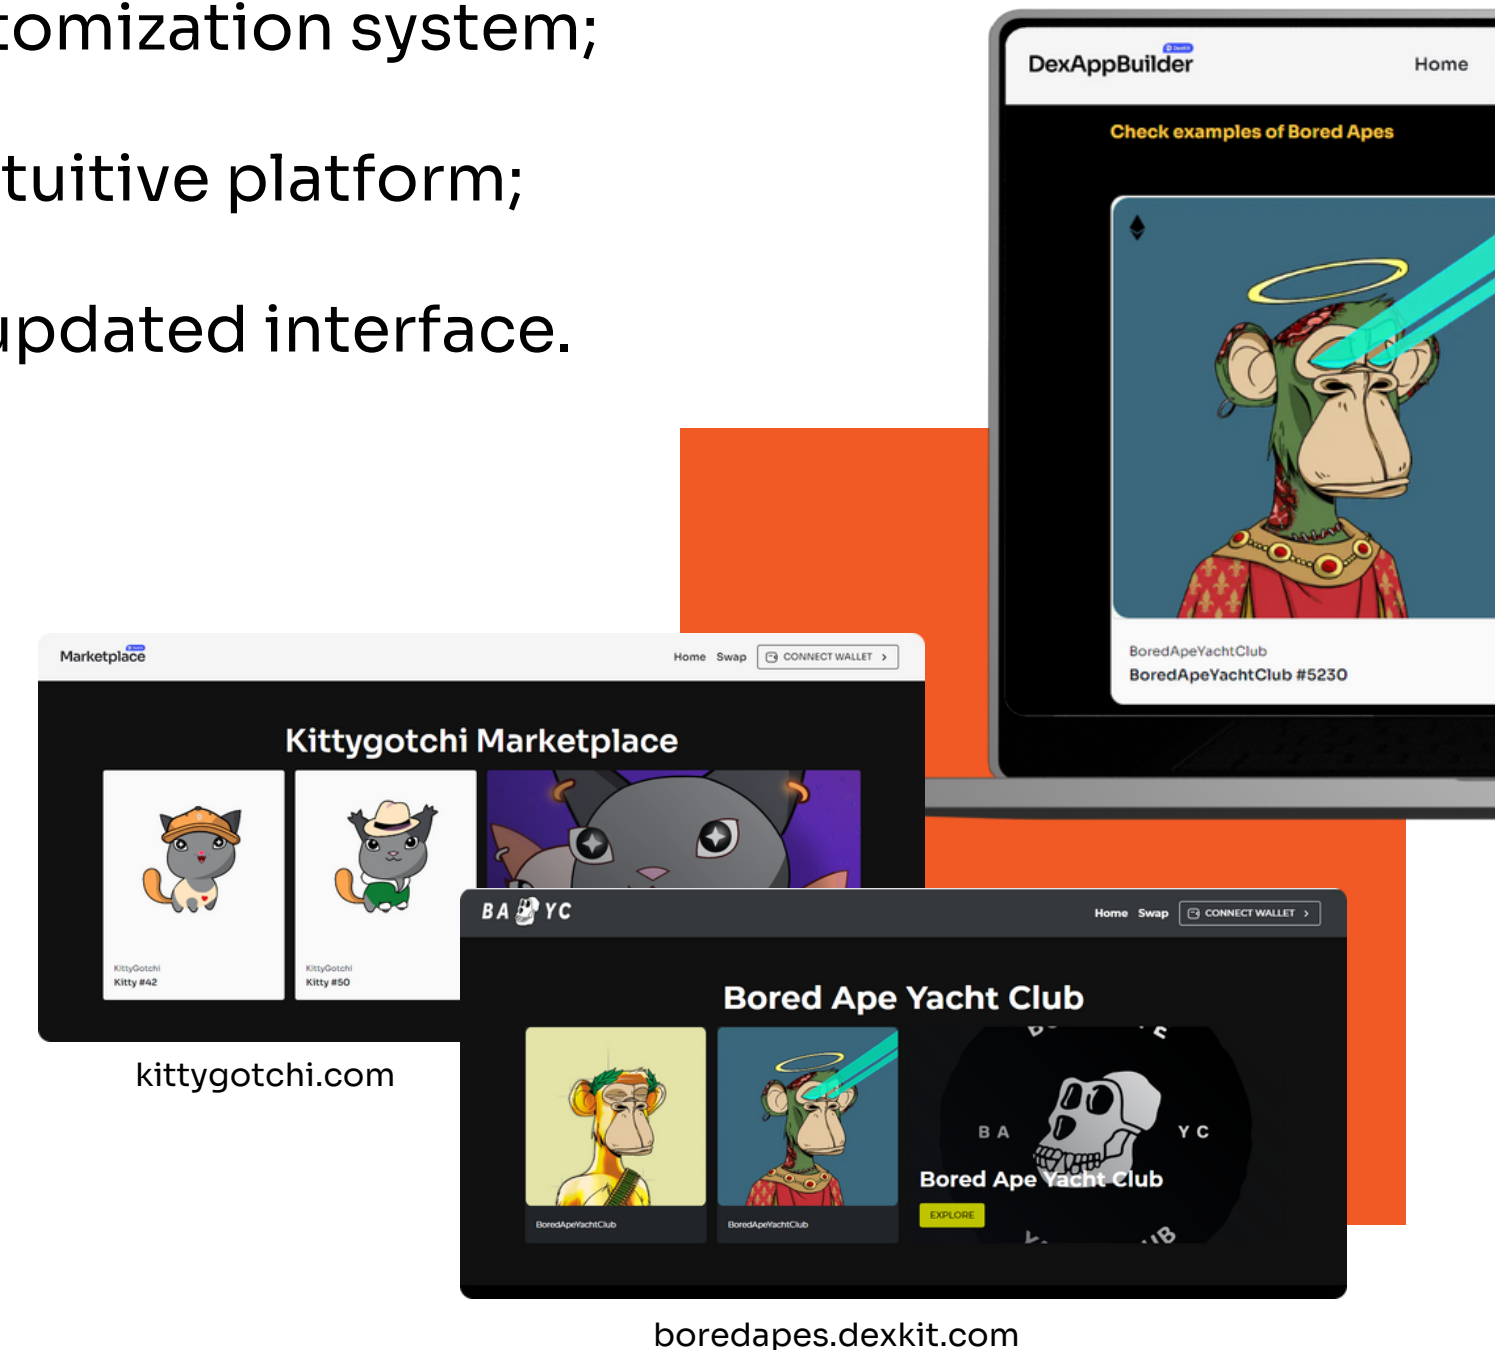

DexAppBuilder

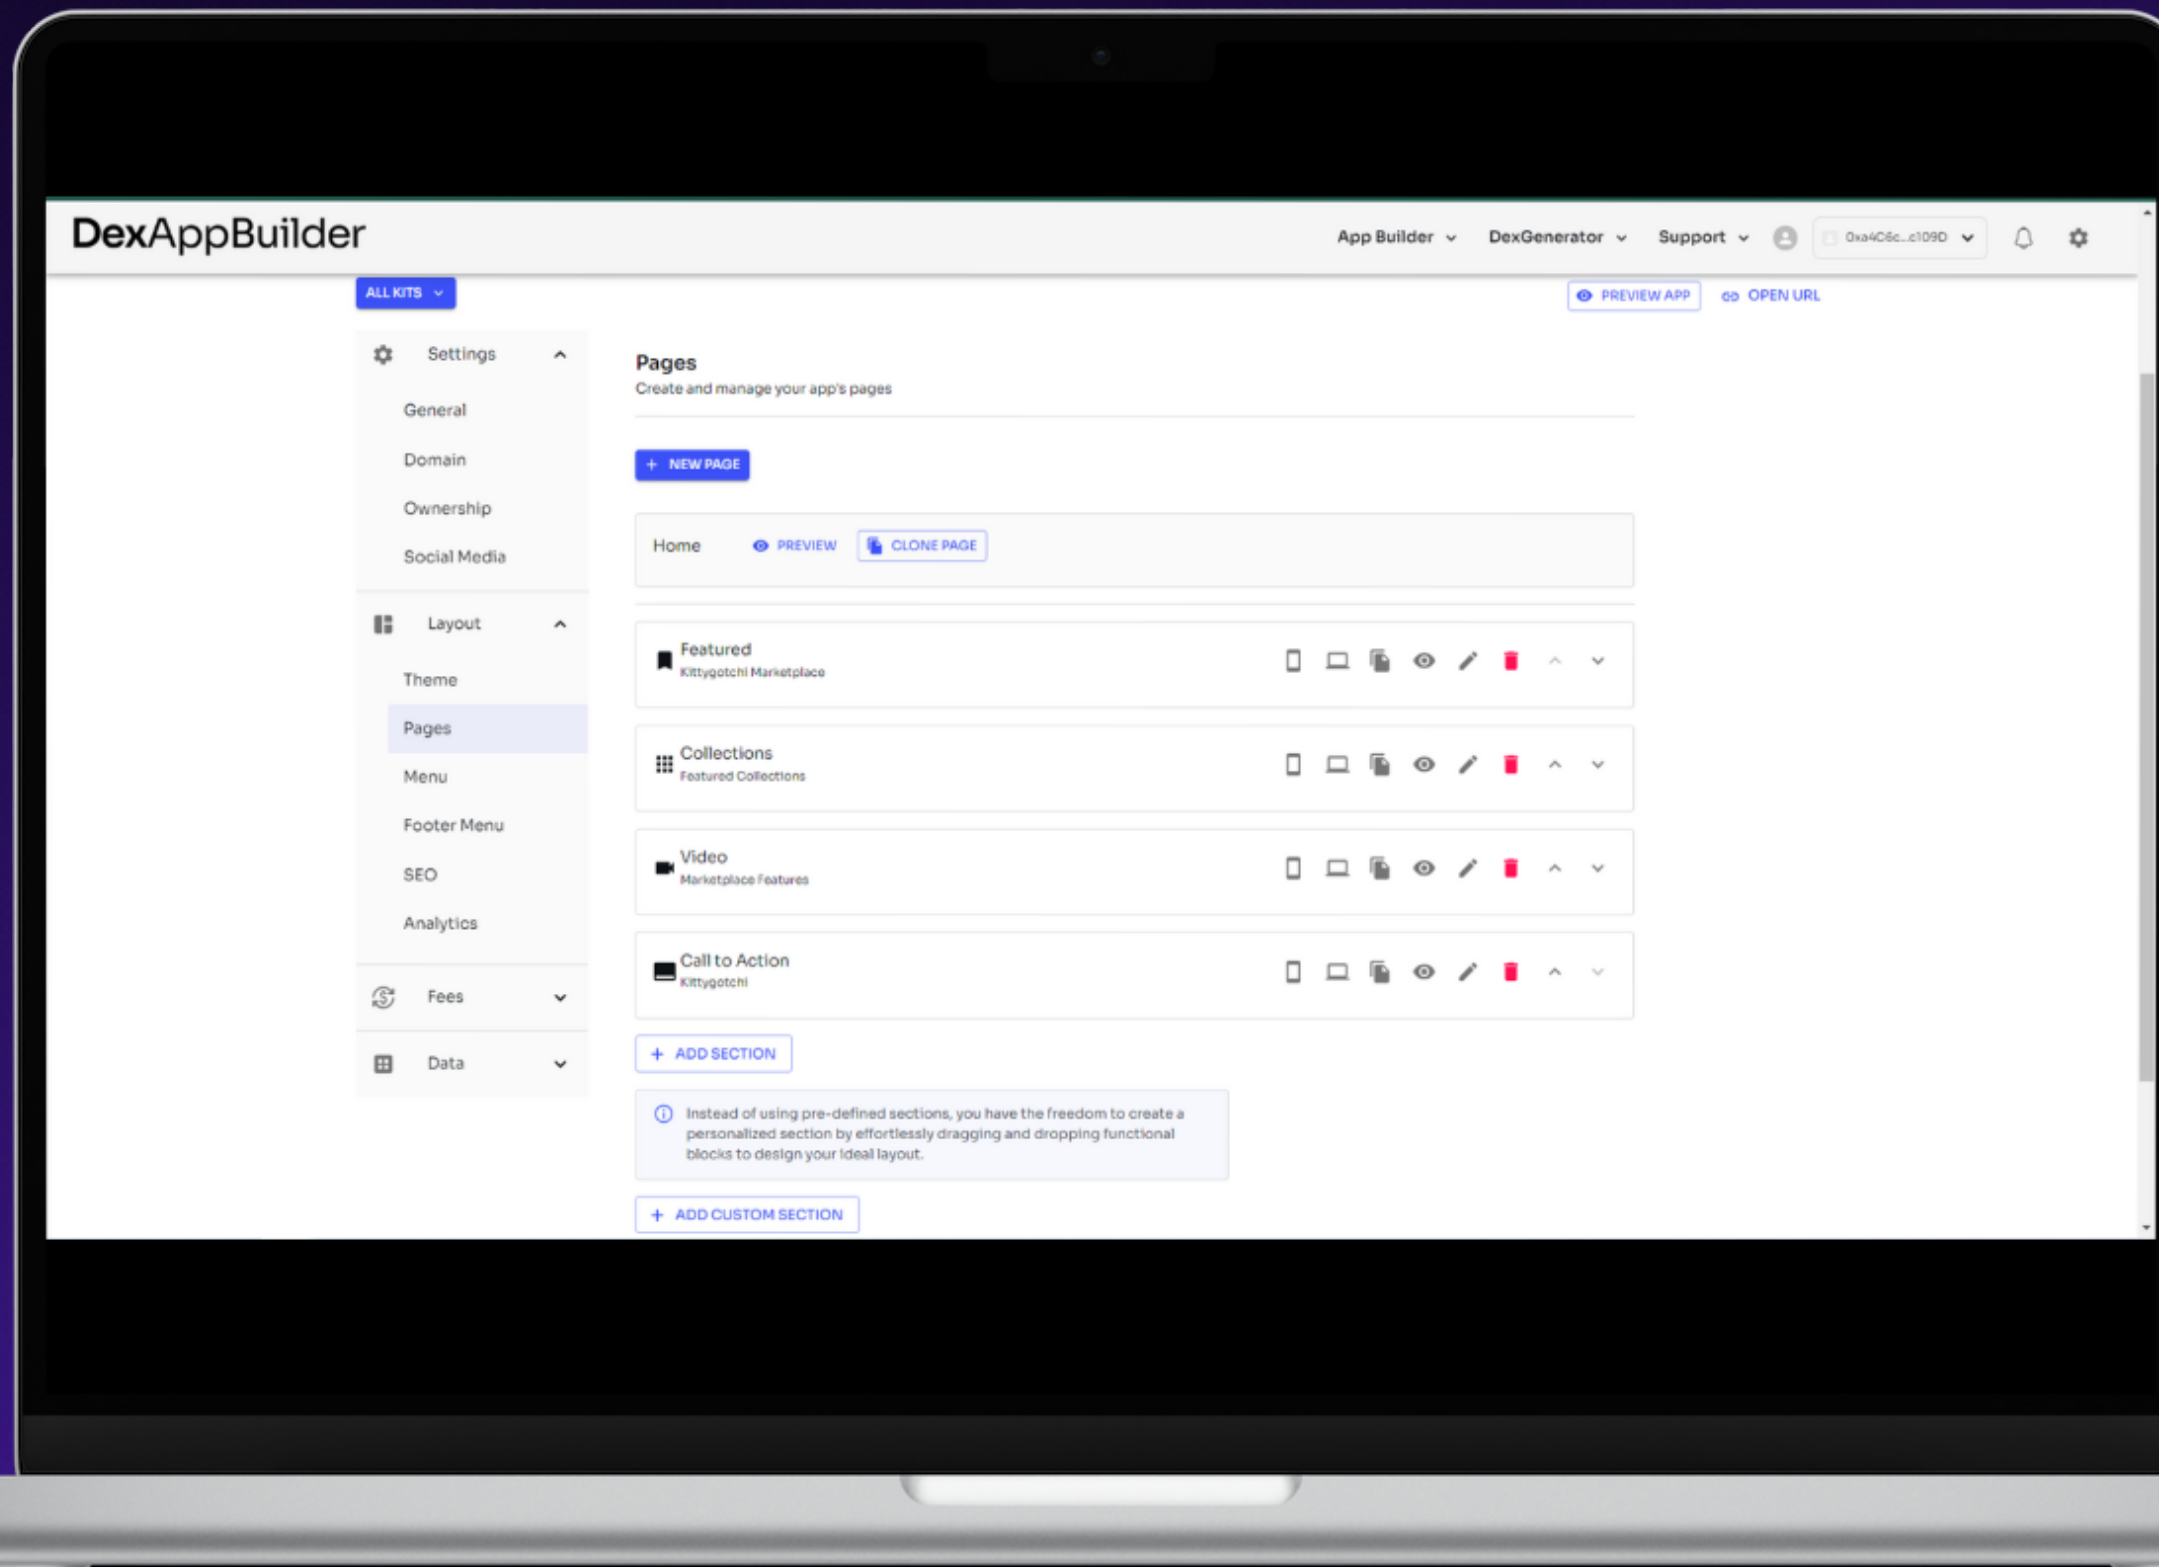

Features:

- Buying and selling crypto: NFTs and Tokens;

Builder

DApp on
Web3

DexAppBuilder

Functional characteristics

- Easy-to-use interface;
 - Adaptable to all screens;
 - No geographical or computational restrictions;
 - Low latency page loading and optimized performance for low-end and small screen devices;
 - Easy configurable.
- Users can configure themes, default collection, tokens, fee percentages and home page according to their brand,

Technical characteristics

- Developed with Next js framework for improved SEO and faster loading;
- Works on Ethereum, BNB Smart Chain (BSC), Polygon, Optimism, Avalanche, Arbitrum, Base, and Fantom networks;
- Cached images ➤ All images are server-cached for faster loading.
- Cloud environment ➤ Fast content delivery and 24/7 availability.
- Adaptability for users to add their own web domain.

Our solutions

DexSwap

DexExchangePro

DexWallet

DexNFTStore

DexGenerator

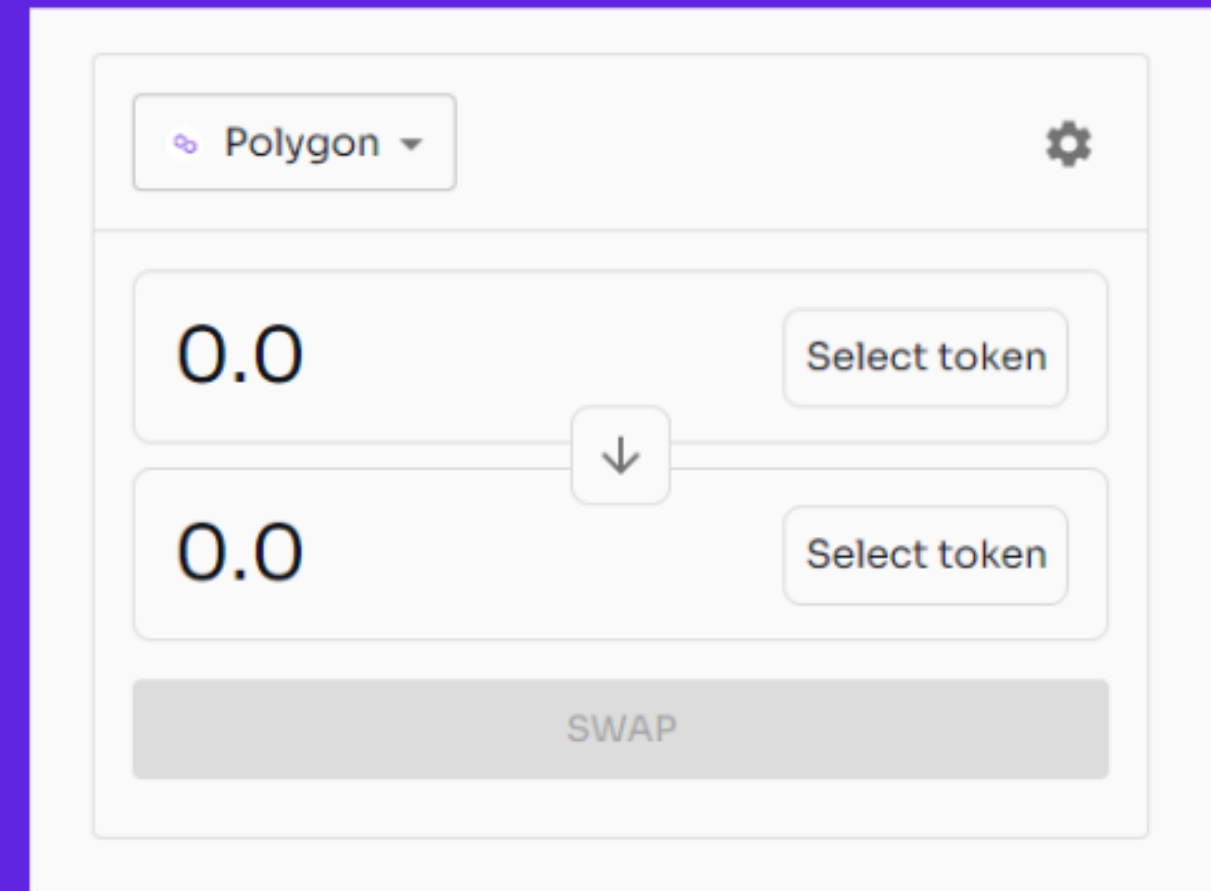

DexSwap

Features:

- Swapping tokens in 0x liquidity pools;
- Adding liquidity to pools to earn fees.

 Swap cryptocurrencies smarter and efficiently with real-time prices and optimized gas fees.

- ✓ Easy swapping of cryptocurrencies;
- ✓ Best prices in real-time (liquidity from multiple sources);
- ✓ Optimizing gas fees.

The screenshot displays the DexSwap web interface. At the top, a dropdown menu is set to 'Polygon' with a gear icon for settings. Below this, there are two input fields, both showing '0.0'. The first field has a 'Select token' button to its right. A downward arrow icon is positioned between the two input fields. The second field also has a 'Select token' button to its right. At the bottom of the form is a large, greyed-out 'SWAP' button.

DexExchangePro

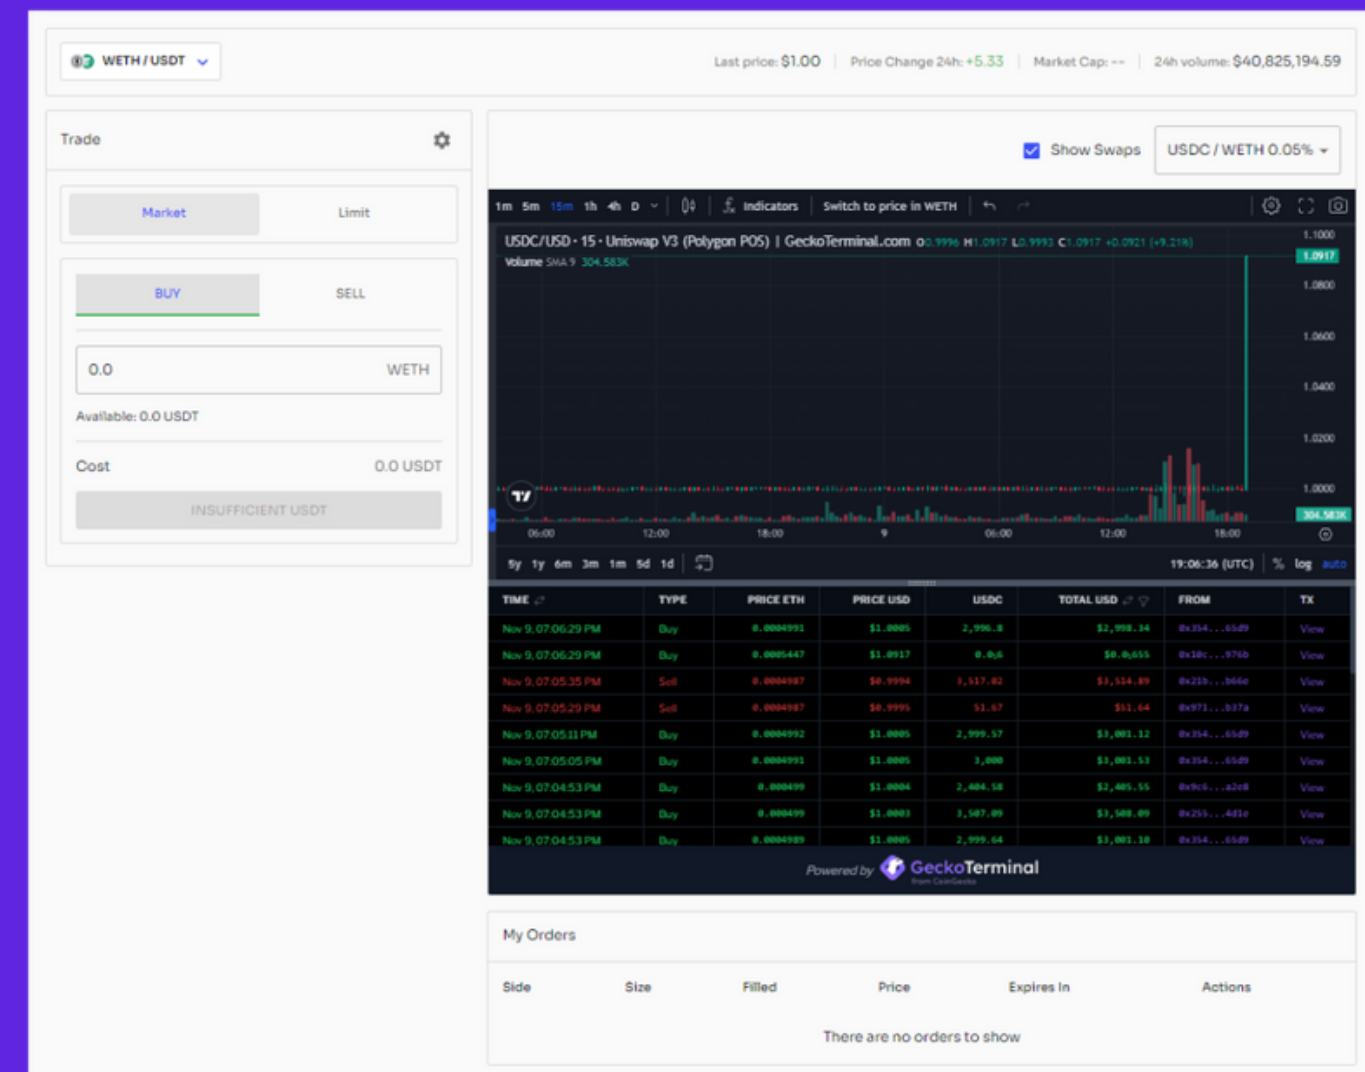

Features:

- Secure trading directly from your wallet (no intermediaries);
- Advanced view feature with real-time charts, order books, and trading volumes for data-driven decisions.

Your professional and secure decentralized exchange. No intermediaries, no hassle.

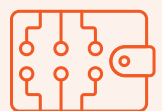

- ✓ Total control over your funds;
- ✓ Multi-blockchain support (Ethereum, Binance Chain, Polygon);
- ✓ Zero-fee limit orders;
- ✓ Easy wallet creation via Google, Discord, or Twitter accounts.

DexWallet

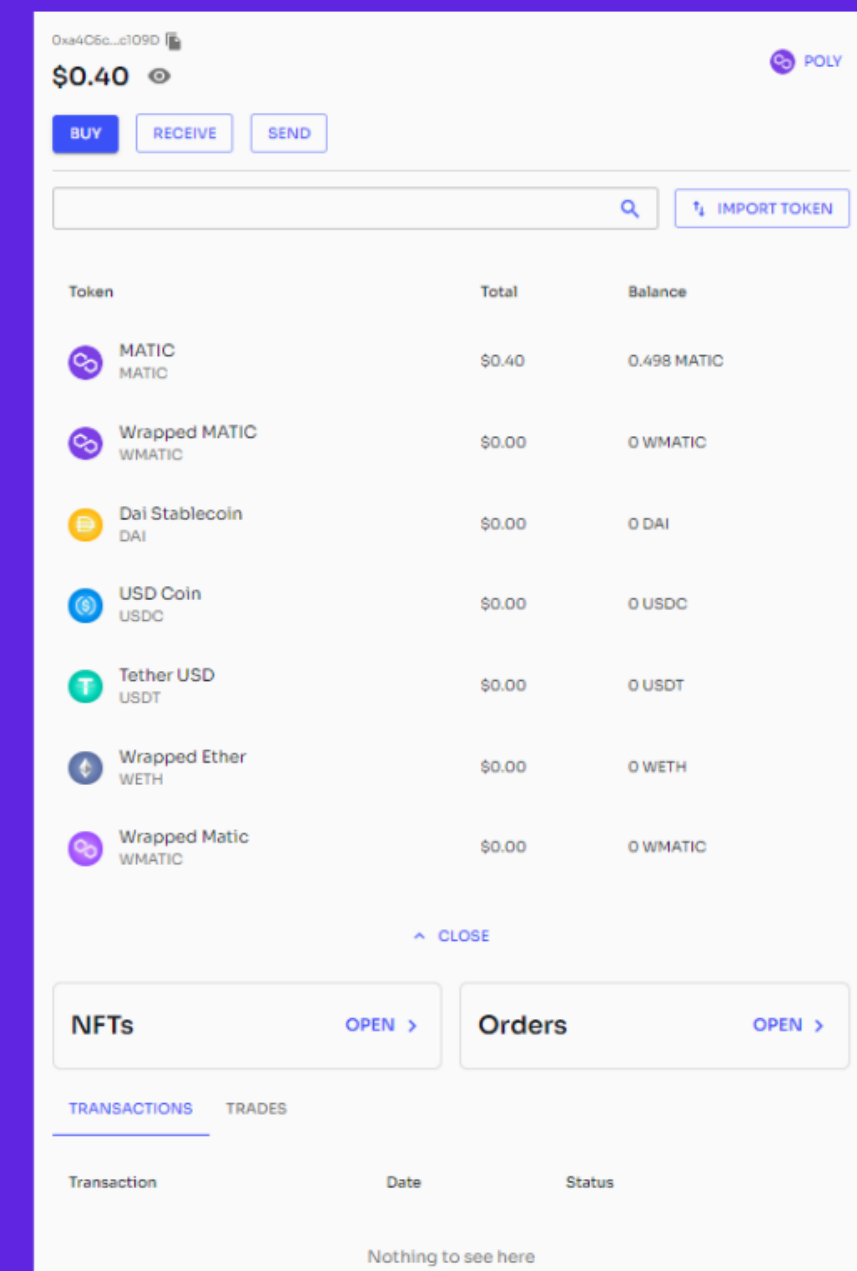

Features:

- Management of cryptocurrencies and NFTs in one place;
- Fiat coin purchases on ramps.

Your crypto companion: Manage and care for your cryptocurrencies and NFTs with ease.

- ✓ Easy-to-use crypto wallet;
- ✓ Coin management on all supported 0x networks;
- ✓ Secure and simple solution.

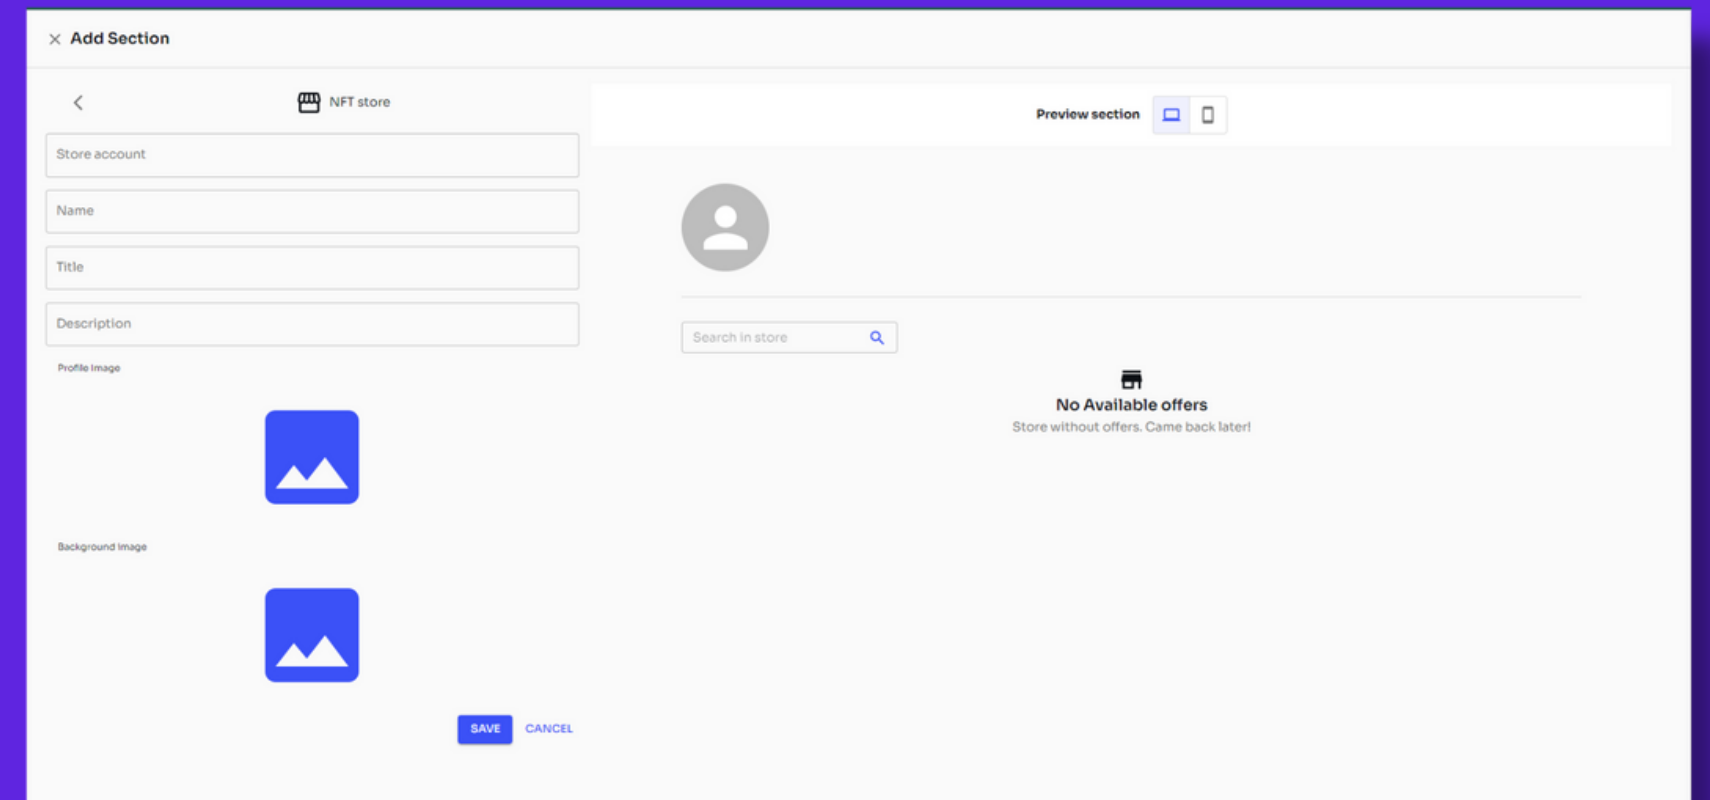

DexNFTStore

Features:

- E-commerce platform to create your own online store for selling NFTs.

- ✓ Similar to Shopify;
- ✓ Specific focus on NFTs.
- ✓ Easy setup and management of your NFT store;

Maximize your NFT sales with a Shopify-like platform for NFT creators.

DexGenerator

Features:

- Generating custom tokens and unique digital asset collections, as well as executing smart contract calls.

Tokens: assets, digital currencies, loyalty points...

Digital assets: images, videos

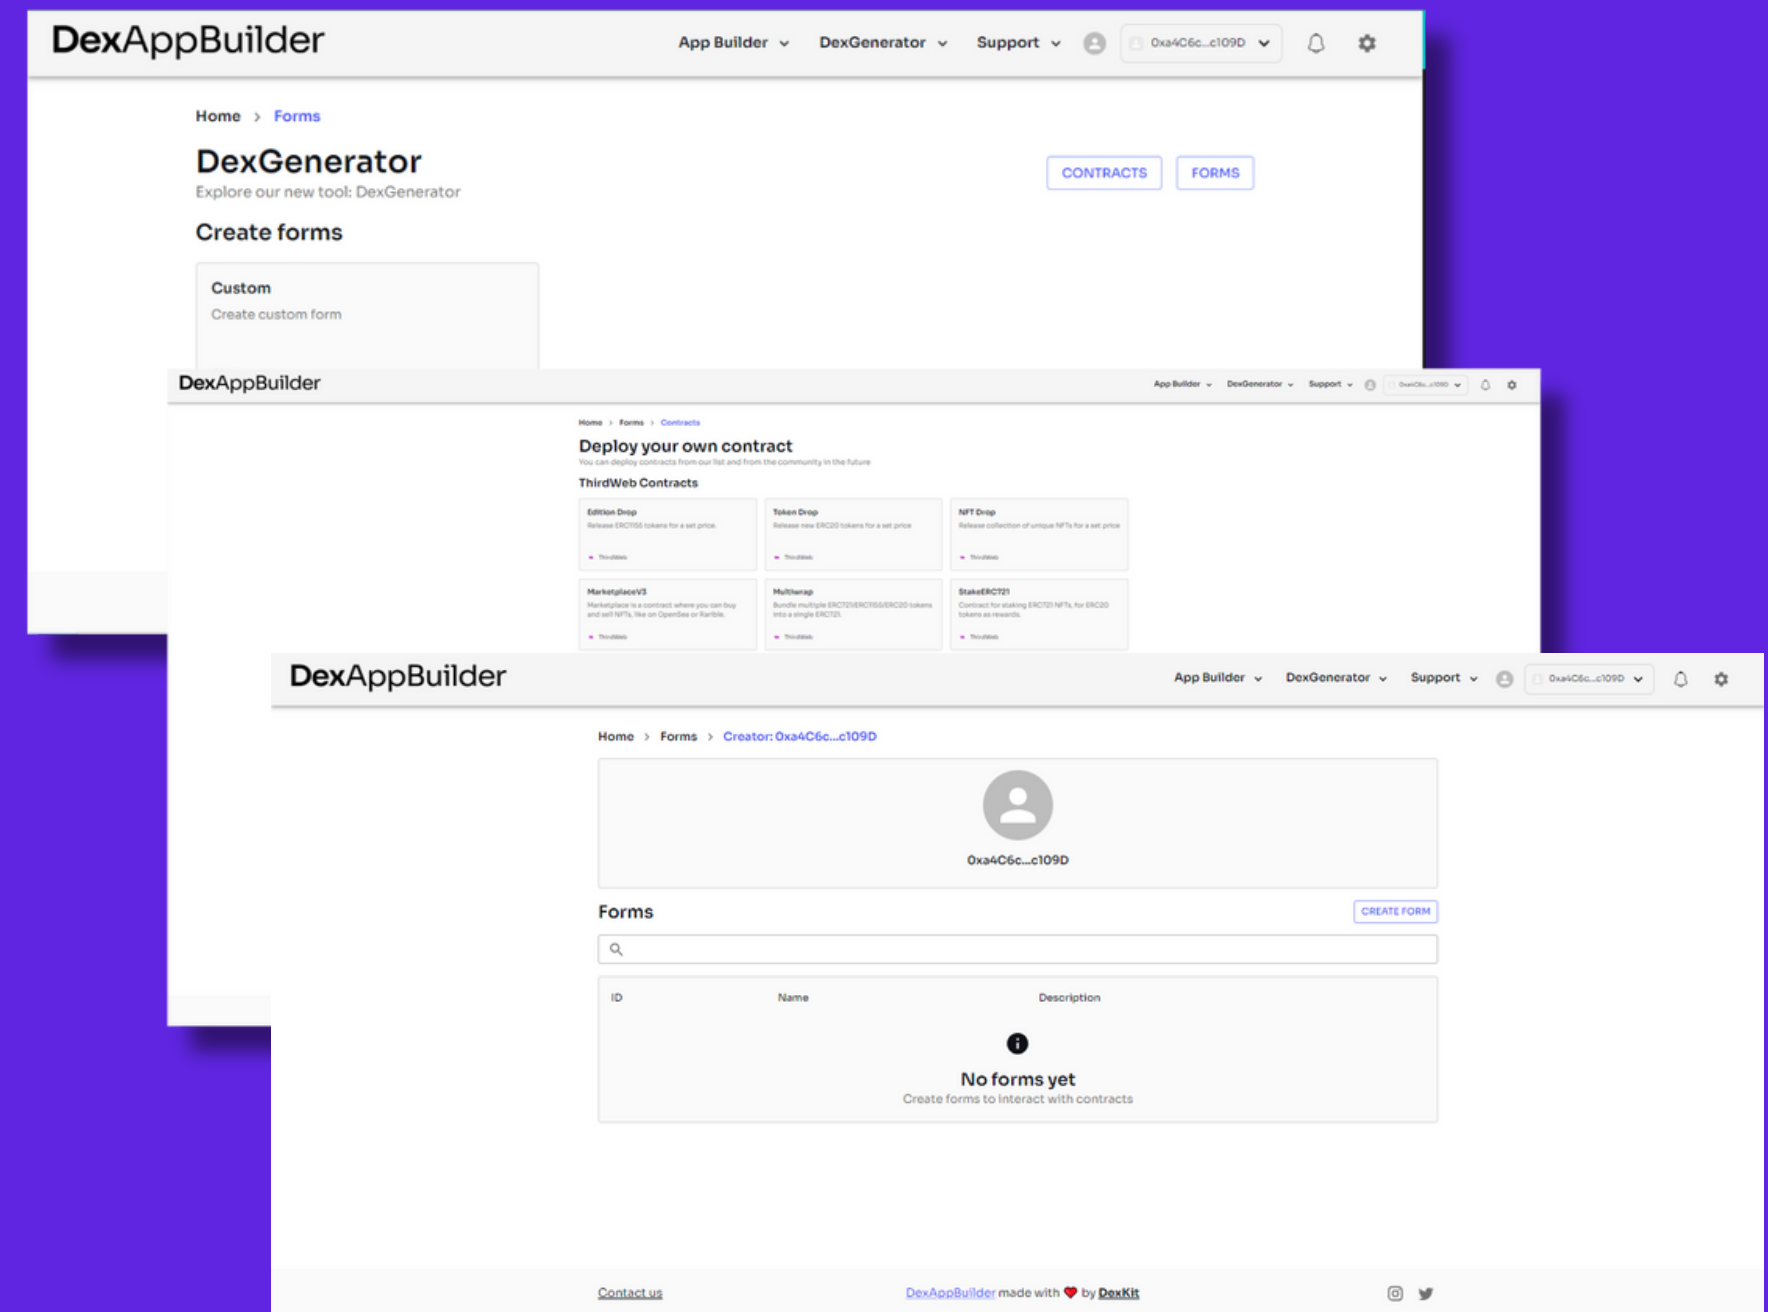

Easily create your own tokens and NFT collections on the blockchain, and take control of your digital assets.

Creation your own tokens or collections on a blockchain platform (of your choice that supports this feature);

AI integration for NFT image generation using natural language.
